Minimum Computer Requirements for NFIRS 5.0

If purchasing a computer or having one donated to you, the following information should help you in obtaining a computer that will handle NEFIRS reporting.

Federal Data Entry Tool:
- 400 MHz Pentium processor (700 MHz or better recommended)
- 64 MB RAM (memory) (512 MB or more recommended)
- Windows 98, Windows 2000, XP or NT (Windows XP recommended)
- 55 MB available hard disk space (500 MB available hard disk space recommended)
- 28.8 Kbps modem (56K (V90) bps recommended)
- Monitor with 800 x 600 resolution
- Mouse

Vendor Software:
- 500 MHz Pentium processor (750 MHz or better recommended)
- 64 MB RAM (128 MB or more recommended)
- Windows 98 SE although Windows 2000 SP3 or Windows XP Professional would be better as future upgrades to the vendors software will probably not work in Windows 98
- 75 MB available hard disk space (1 GB or more recommended)
- 28.8 Kbps modem (56K (V.90 bps) would be better)
- CD-ROM drive (or DVD or CD-RW drive)
- Monitor with 800 x 600 resolution
- Mouse
